Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference

Upper Bound and Lower Bound are from "Hospitalization Data" sheet in Excel input

Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference

Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference

Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference

Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
Very low number of iterations, DO NOT use for inference
Prior Distribution, niter = 10000

Posterior Distribution, niter = 34
